## FUND DESCRIPTION

The CMG Mauldin Core Fund seeks to generate capital appreciation. The Fund invests across various asset classes and sectors of the U.S., foreign and emerging equity and fixed income markets. The Fund's tactical asset allocation approach is managed by the Fund's co-portfolio managers, Stephen Blumenthal and John Mauldin.

## TACTICAL ASSET ALLOCATION INVESTMENT PROCESS

The Advisor favors research driven, model-based strategies that are implemented following an objective, rules-based investment process. The thesis of the Fund's investment strategy is that objective, rules-based investment strategies that employ a flexible mandate generally have low correlation to the broad markets. Similarly, because each of the research providers consider risk differently, their investment focuses are also likely to have low correlation to each other. As such, the Advisor believes that its tactical allocation methodology will produce a diversified low volatility portfolio that seeks long-term capital appreciation.

**An investor should consider the Fund's investment objective, risks, charges, and expenses carefully before investing. This and other information about the CMG Mauldin Core Fund is contained in the Fund's prospectus, which can be obtained by calling 866-CMG-9456. Please read the prospectus carefully before investing. The CMG Mauldin Core Fund is distributed by Northern Lights Distributors, LLC. Member FINRA/SIPC. NOT FDIC INSURED. MAY LOSE VALUE. NO BANK GUARANTEE. CMG Capital Management Group, Inc. is not affiliated with Northern Lights Distributors, LLC.**

*Mutual Funds involve risk including the possible loss of principal. When the Fund invests in fixed income, the value of your investment will fluctuate with changes in interest rates. Potential risks include maturity length, default and prepayment and credit risks. High yield or 'junk bonds' may present risks greater than bonds of higher quality. Foreign investments, including emerging markets, may be subject to fluctuating currency values, adverse political, social and economic developments, liquidity and volatility. The sub-adviser's methodology may produce incorrect judgements about the attractiveness, relative value and potential appreciation of an investment. The Fund may invest more than 5% of its assets in the securities of one or more issuers. Equity prices can fall rapidly. Smaller and mid-sized companies may experience higher failure rate than those of larger companies. Mutual funds, closed end funds and ETFs are subject to expenses, indirectly paid by the Fund, resulting in greater expenses to the Fund.*
